It Pay\$ to Recycle!

DID YOU KNOW?

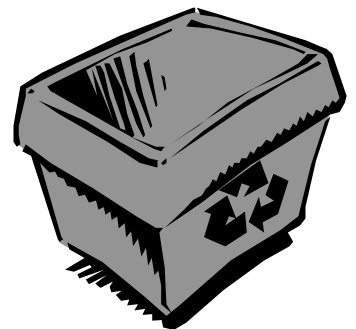

Millions of printer cartridges end up in landfills every year. Most of these cartridges are worth money and can be recycled. Our school is now working with *TONERinx*, a recycling company here in Portland that will buy back these empty cartridges to help our school raise money. Last year *TONERinx* paid out over \$35,000 to Portland area schools and diverted over 25 tons of waste.

HOW CAN YOU HELP?

It's simple. Our ongoing fundraiser is designed to collect and recycle empty inkjet and laser cartridges from your home or office printers. Instead of discarding these cartridges, which could eventually end up in our landfills, we encourage you to recycle them at our school. Deposit your cartridges in the blue tub located in the school.

OUR GOAL!

We can earn several hundred dollars or more this year with your participation. Certain cartridges can be worth as much as \$12.00 each.

CELL PHONES TOO.

Old cellular telephones are also worth money and can be recycled along with the cartridges.

Please help our school and the environment!
